GRAVUN COOKIE NOTICE

Effective Date: September 19, 2026

This Cookie Notice explains how **Gravun Inc.** (**"Gravun," "we," "us,"** or **"our"**) uses cookies and similar technologies on **gravun.com**, **app.gravun.com**, and customer-facing pages operated through the Gravun platform.

Read this Notice with our **Privacy Policy** at [Insert link], which explains our handling of personal information, disclosures to providers, international processing, and privacy rights.

1. Technologies Covered

1.1 Cookies. Cookies are small files that a website places on your browser or device. They can support functions such as maintaining a session or remembering a choice.

1.2 Similar Storage. Browser technologies such as local storage and session storage can retain information without using a traditional cookie. References to cookie choices in this Notice include those technologies where the relevant control applies.

1.3 Other Technical Records. Servers, error-monitoring tools, and communication providers may generate technical records without placing a cookie. Blocking cookies does not necessarily stop those activities.

1.4 First-Party and Third-Party Technologies. Some technologies are set through Gravun's domains. Others may be supplied by providers supporting a feature you use. The domain or provider name alone does not establish the purpose or privacy effect of a technology.

2. Where Technologies Are Used

2.1 Marketing Website. The public website at gravun.com has its own hosting and configuration. Its specific technologies are identified in the register in Section 8.

2.2 Application. The application at app.gravun.com uses technologies supporting authentication, sessions, security, and preferences. The application does not currently use third-party advertising cookies.

2.3 Customer-Facing Pages. Booking, estimate, invoice, payment, and signing pages may use technologies needed to display the requested transaction, maintain its session, or protect access.

2.4 External Services. If you follow a link to another website or use a provider's separately operated service, its own notices and controls may also apply. Our use of an embedded provider is described in the register where relevant.

3. Purposes and Categories

© 2026 Gravun Inc. All rights reserved

3.1 Necessary Functions. These technologies support functions needed to provide the service you request, such as authentication, session continuity, security, and retaining privacy choices.

They are not used for unrelated advertising merely because they are categorized as necessary. Browser controls may block them, but affected functions may then be unavailable.

3.2 Optional Preferences. Where deployed, optional preference technologies remember choices that are convenient but not required for the requested service. Their specific purposes and controls appear in Section 8.

3.3 Optional Measurement. Where deployed, measurement technologies help us understand visits, navigation, or feature use. Their providers, information, and purposes must be identified in the register. A technology is not treated as necessary solely because measurement is useful to Gravun.

3.4 Diagnostics and Security. Error and security records help identify faults, investigate misuse, and maintain reliability. The register distinguishes browser storage from diagnostic processing that occurs without cookies. Optional diagnostic functions are subject to the applicable choices.

3.5 Advertising. Any advertising or cross-site tracking technology must be specifically identified before use, together with the applicable choices. A description of this category does not mean that such technologies are deployed across all Gravun pages.

4. Your Choices

4.1 Optional Technologies. Under Gravun's consent configuration, optional browser technologies are disabled until you make the relevant affirmative choice. Rejecting optional technologies does not prevent use of functions that do not require them.

4.2 Settings. Where optional technologies are deployed, you can select **"Cookie settings"** at 10 Four Seasons Place, Etobicoke, ON M9B 6H7, to accept, reject, or change your choices.

4.3 No Consent by Browsing. Continuing to browse, scrolling, or closing a notice is not treated as consent to optional technologies.

4.4 Withdrawal. Changing a setting to "off" stops future optional activity controlled by that setting. We will remove associated storage where it is within our control and technically possible. The change does not automatically erase information already lawfully collected; privacy requests may be submitted under the Privacy Policy.

4.5 Browser Settings. You can also manage cookies and site data through your browser. Clearing site data may sign you out and remove saved preferences, including your privacy selections.

© 2026 Gravun Inc. All rights reserved

4.6 Devices and Domains. Choices may be specific to the browser, device, or site on which you make them. Where a choice is applied across Gravun domains or associated with an account, the settings interface will explain that scope.

4.7 Required Functions. Rejecting optional technologies does not disable necessary authentication or security functions. If a requested optional feature requires a provider connection, we will explain that connection before activation.

5. Browser Privacy Signals

5.1 Recognized Signals. Where applicable law requires a qualifying browser-based opt-out preference signal to be honoured, we will apply it to the processing and information covered by that requirement.

5.2 Scope. A signal may apply to a particular browser or device and, where required and reasonably associated, an account. It does not necessarily control every processing activity described in our Privacy Policy.

5.3 Separate Choices. A general cookie selection must not silently override a legally recognized opt-out signal. Any permitted change to that preference must follow the applicable requirements.

6. Messages, Links, and Notifications

6.1 Communication Events. Emails, text messages, and links may generate delivery, opening, or click records where supported by the relevant provider and feature. These activities do not necessarily use website cookies.

6.2 Customer Communications. A business using Gravun may receive information about interactions with its communications. Its own notices and communication choices also apply.

6.3 Separate Controls. Rejecting website cookies does not automatically unsubscribe you from messages or disable all communication tracking. Use the relevant unsubscribe method, communication preferences, or privacy-request process.

6.4 Push Notifications. Browser notifications require the applicable browser permission. You may revoke that permission through browser or device settings. A cookie choice does not itself grant permission for push notifications.

7. Storage Duration and Personal Information

7.1 Duration. Session-based technologies generally expire when the relevant session ends. Persistent technologies remain until their configured expiry or earlier deletion. Some local-storage entries have no automatic expiry and require a specified removal process.

7.2 Separate Retention. Browser-storage duration is different from the period for which a provider or Gravun retains information collected through it. The Privacy Policy explains the criteria governing that retention.

© 2026 Gravun Inc. All rights reserved

7.3 Information Involved. Depending on the technology, information may include session identifiers, preferences, IP addresses, browser details, timestamps, and interaction events. Identifiers may constitute personal information even where they do not contain your name.

7.4 Providers and Locations. Providers may process relevant information outside your province, state, or country as described in the Privacy Policy and applicable provider disclosures.

8. Technology Register

The register identifies the technologies deployed on each relevant Gravun surface. It must be completed and updated from the actual configuration.

Technology name or storage key	Site or page	Provider and domain	Purpose and information involved	Category and activation rule	Browser duration or removal rule
[Actual authentication/session entry]	[Application or relevant page]	[Confirm]	[Describe session function and identifiers]	Necessary, where required for requested access	[Verify]
[Actual preference entry]	[Identify]	[Confirm]	[Describe specific preference]	[Necessary or optional, based on function]	[Verify]
[Consent-choice entry, if implemented]	[Identify]	[Confirm]	Stores the selected privacy choices and version	Necessary to retain choices	[Verify]
[Diagnostic technology, if applicable]	[Identify]	[Confirm actual Sentry configuration or other provider]	[Describe data and whether browser storage is used]	[Classify actual functions]	[Verify or state “No browser storage”]
[Payment-related technology, if applicable]	[Payment page]	[Confirm provider/domain]	[Describe payment or fraud-prevention function]	[Classify actual functions]	[Verify]
[Marketing website technology]	gravun.com	[Confirm actual host/provider]	[Describe]	[Classify]	[Verify]
[Other detected entry]	[Identify]	[Confirm]	[Describe]	[Classify]	[Verify]

9. Updates and Contact

9.1 Updates. We may update this Notice when technologies, purposes, or legal requirements change. The revised Notice will show its update date.

9.2 New Purposes. Publication of an updated Notice does not itself provide consent for a new optional purpose. We will obtain any additional choice required before enabling it.

9.3 Contact. Questions about this Notice or associated privacy rights may be sent to:

Privacy Officer — Gravun Inc.
Email: Hello@gravun.com
Mailing address: 10 Four Seasons Place, Etobicoke, ON M9B 6H7

GRAVUN COOKIE INTERFACE WORDING

1. Banner Where Optional Technologies Are Deployed

Heading: Your cookie choices

> We use necessary technologies to keep this site working and secure. With your permission, we also use [Insert only the optional purposes actually deployed]. You can reject optional technologies or choose your settings.
>
> [Cookie Notice] · [Privacy Policy]

Buttons displayed with comparable prominence:

Accept optional
Reject optional
Choose settings

Closing the banner must leave optional technologies disabled unless a valid prior choice applies.

2. Settings Panel

Heading: Cookie settings

Necessary

> Supports the functions you request, including relevant session, security, and privacy-choice features. These functions cannot be disabled through this panel.

Status: Always active when required

Preferences

Display only if deployed:

> Remembers [Identify actual optional preferences]. Turning this off means those preferences may not be retained.

Default: Off

Measurement

Display only if deployed:

© 2026 Gravun Inc. All rights reserved

> Helps us understand [Specify actual visit or usage measurement]. Providers and storage periods are listed in the Cookie Notice.

Default: Off

Advertising

Display only if deployed and separately approved:

> Allows [Identify providers] to use [Specify information] for [Explain actual advertising purpose, including cross-site activity where applicable].

Default: Off

Buttons:

Save choices
Reject optional
Accept optional

3. Saved-Choice Confirmation

> Your cookie choices have been saved for [Accurately state the browser, site, or account scope]. You can change them through “Cookie settings.”

4. Necessary-Only Notice

Use instead of an optional-consent banner where the verified configuration contains only necessary technologies:

> This site uses necessary technologies for [State actual functions]. See our Cookie Notice for details.

Link: Cookie Notice

Do not display fictitious optional categories or an “Accept all” button where there is nothing optional to accept.

5. Optional Embedded Content

Where activating an embedded feature creates an optional provider connection:

> Loading this [Video/map/other feature] connects to [Provider] and shares [Describe relevant information]. Read [Provider privacy link] before continuing.

© 2026 Gravun Inc. All rights reserved

Buttons:

Load this feature
Keep blocked

A choice to load one feature must not authorize unrelated tracking.

6. Recognized Opt-Out Signal

Display only after the applicable processing has actually been restricted:

> Your browser's privacy signal has been recognized. The applicable sale, sharing, or targeted-advertising activity is disabled for [Accurate scope].

7. Preference-Control Failure

> We could not save your updated choice. Optional technologies remain disabled while we resolve this issue. Please try again or contact Hello@gravun.com.

Use this message only if the implementation actually fails closed as described.
